It's Here! eClinicalWorks Version 8.0

eClinicalWorks has released its most compelling version yet. eCW has spent months working with customers at the November 2006 Roundtable, the New York City Department of Health and Mental Hygiene, and the Northwest User Group to enhance its EMR and PM solutions. eClinicalWorks now supports state-of-the-art chronic and preventative care management with patient-centric clinical decision support and population measures. The Practice Management System has been enriched with enterprise functions to support multiple sites of any size and multiple specialties.

eClinicalWorks Electronic Medical Record (EMR)

Enhancing its flagship solution, eClinicalWorks has developed clinical measures and new ways for managing chronic and preventative care through a real-time clinical decision support system, further distinguishing eClinicalWorks EMR and benefiting customers in all specialties and practice sizes. A sample of additional enhancements to the EMR include:

- Structured data for reporting and researching patient information
- Enhanced referral management
- New drug database—Medi-Span®
- Support of LOINC codes in labs
- Order Sets

eClinicalWorks Practice Management (PM)

The practice management portion of the eCW Solution meets the needs of large/enterprise clients as well as small & medium-size practices. Enhancements have been made to the enterprise workflow management for claims along with PQRI support. Here are just some of the additional PM features:

- Automated claims and statement processing
- Rejection-based workflow manager
- Enterprise task manager

eClinicalWorks Electronic Health Exchange (eHX)

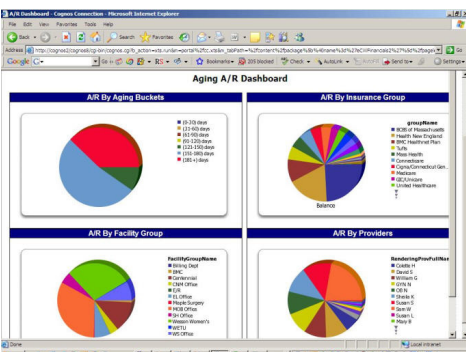

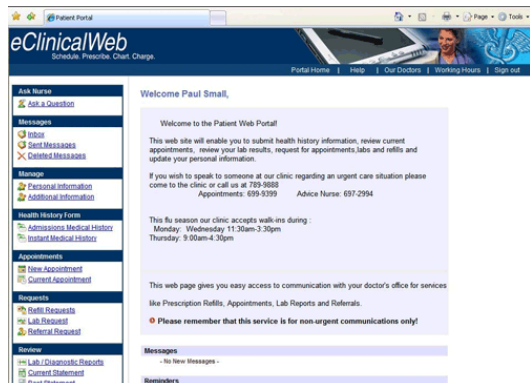

eCW's Electronic Health Exchange (eHX) continues to be the glue that binds all of its solutions together to create a holistic view of a patient's ambulatory record for community-wide projects. Enhancements include:

- Electronic referrals
- Import & export of patient records
- Quality and care management

Patient Portal

Patient Portal now offers enhanced patient communication via text message (SMS) in addition to the always available e-mail. Additional new features include:

- Integration with Instant Medical History
- Enhanced patient history intake
- Ability to support specialty-specific history questionnaires

NEW! eClinicalWorks Business Optimization (eBO)

eClinicalWorks is launching a new product offering—Business Optimization reporting. The new clinical and financial business optimization features that are included in eBO allow for more dynamic reporting with drill-down and custom report writing based on meta-data. This report generation solution enables customers to create their own customized reports on demand.
